

# Ballet™, *Performance drapery sheer*

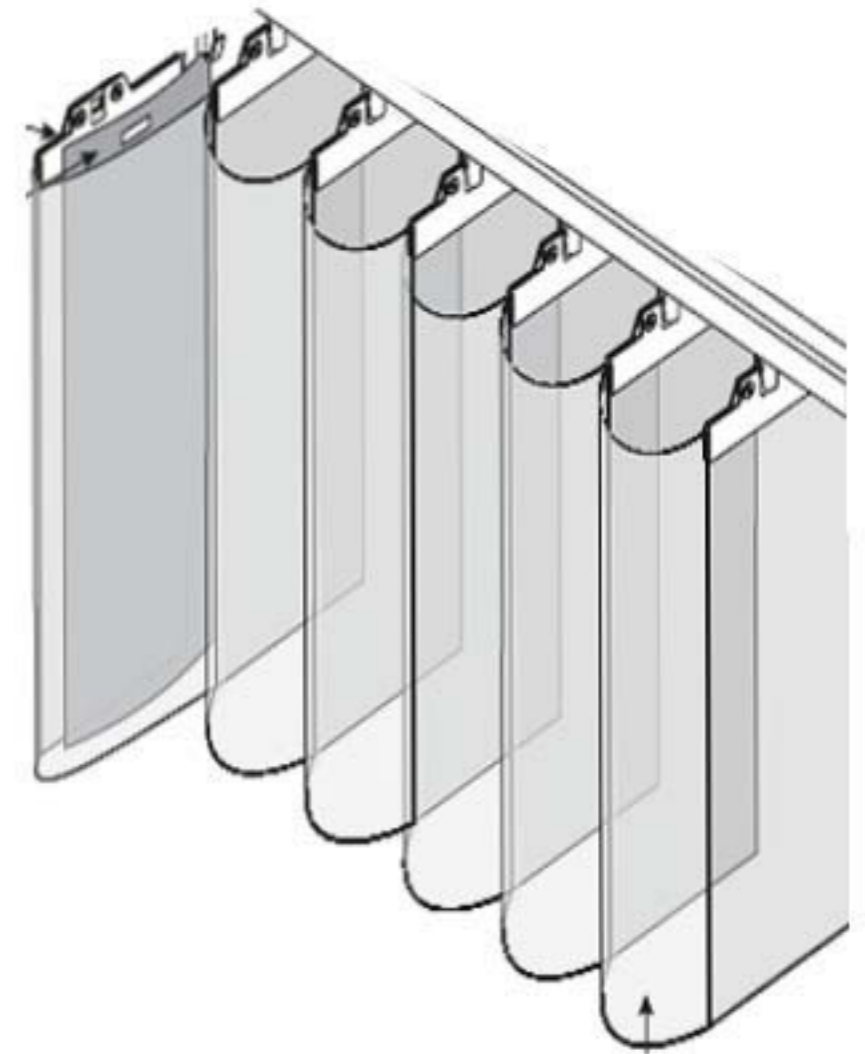

# Summary

- Soft fabric sheers
- Sheers are light diffusing and available with a room darkening vane option.
- Available as a side or split stack
- Engineered, patented hinged fabric is exclusive to Turnils Australia.
- Ideal for new installation or 89mm vertical blind refurbishment.
- Easy to install.

# Ballet fabrics

- Drapery look with the performance of vertical blinds.
- The sheer fabric hang straight without the use of unsightly weights or bottom chains
- Panels are “pinched-welded” at the bottom to keep billows consistent.
- The continuous lengths of knit polyester fabrics fold into appealing billows, without adding vertical vanes
- Panel width: 450mm (6 carriers)
- Available as panels or full rolls (100lm, 1500mm wide).
- UV stable (colourfastness)

# Ballet™ fabrics & vanes

- Fabric colours & styles
  - Linen Ivory
  - Linen Hazelnut
  - Vintage Décor Ivory
  - Vintage Décor Hazelnut
- Optional room darkening vanes
  - Curved PVC darkening vanes attach behind sheers with a specially designed carrier clip.
  - Colour Ivory

# Ballet™ rotation

- Ballet™ sheers rotate and traverse to the side, providing a full range of light control & privacy.

## **Vanes Stacked**

Sheers are pulled to the side to provide a clear, unobstructed view. (sheers should be in the open position before being pulled closed and stacked).

## **Vanes Rotated**

Enjoy variable degrees of privacy and light control when the sheers are rotated.

## **Vanes Open**

Light is softly diffused when the sheers are open and drawn.

# Light control & privacy

- Ballet™ Performance drapery sheers are a unique and highly innovative soft drapery alternative that provide UV protection, light control and privacy.
- When looking directly at the shading in the closed position, the sheers provide perfect privacy
- The sheers can be rotated left or right. The level of privacy can easily be adjusted by rotating the sheers to the desired angle of closure.
- Vanes closure varies from top to bottom providing optimum closure in the top  $\frac{3}{4}$  of the product
- Optional room darkening vanes can be added for increased privacy and light control.
