Telis Composio RTS

Somfy's new 20 Channel transmitter, the *Composio RTS* is now available. All motorised items: roller shutters, internal and external blinds, windows and garage door and gate openers equipped with a Radio Technology Somfy (RTS) receiver, can be controlled by the new *Composio RTS*.

Composio RTS features a large LCD screen allowing the user to easily navigate around the menus and groups. A group may consist of one or more motors or receivers. For example a group could be "All Shutters" controlling all the Roller Shutters on a house allowing them to be all closed together at night.

All of the roller shutters in the home can be closed at the same time at night. This group could be called "All Shutters"

To harmonize with your client's décor these 2 remotes are available in Silver and Lounge finishes.

Free to choose your functions

To control a single window covering:
Situo RTS
room control

To control a multiple window coverings:
Telis 4 RTS
remote control units

Sonesse 50: now available

Somfy has recently received our first shipment of the new *Sonesse 50* motors. Showcasing the latest in silent motor technology this exciting new motor is available as a 3Nm 28rpm RTS motor in Star Head or Round Head versions. Wired Technology motors will follow in the first quarter of 2008.

Sonesse 50 offers a premium solution to the Internal Window Treatment market. Unique to Somfy it is the quietest tubular motor available today at only 44dBA and virtually no vibration at all. *Sonesse 50 RTS* is compatible with all Somfy RTS transmitters including the new *Composio RTS*.
