

Solare Teknica | T5000

EXTERIOR ROLLER | SIDE RETENTION ZIP

With head box and side channel as standard, the fabric is tensioned by utilising a floating channel, located within the special two piece side channel, eliminating the possibility of fabric "blow outs" or light gaps. As the fabric is held taught between the left and right channels, this system is ideal for enclosing courtyards, patios or balconies; essentially adding an extra room to the home. The Solare Teknica 5000 is a great way to shelter courtyards and other outdoor spaces from wind, insects and UV rays. Hand operation is also available with Lite Rise Spring Balance system that allows you to easily operate by hand.

Specifications:

Size:

Maximum Width: 5m or, Maximum Drop: 4m – up to max. 16m²

Style:

Exterior Roller I (SRS) Side Retention System I Zip System
