

## 600 STAIN

# SPIRIT

Spirit Stain is a thinners based stain which can be sprayed, wiped or brushed on to wood surfaces.

Our Stains spread more evenly than other stains and can be applied under lacquers, acid cats and polyurethane coatings. Up to 5% can be added to your first coat for shading purposes.

Depending on the type of timber being used, you will achieve different results. It is always best to carry out tests on off-cuts to make sure you are using the correct technique to achieve the desired effect.

Simply provide a sample of the stain colour you would like matched, along with an off-cut of the timber you will be using for the stain.

## 602 STAIN

# WIPING

602 Wiping Stain is used to achieve the traditional 'limed' or 'pickled' finish on wood substrates.

BLACK BURNT UMBER WHITE

The above colours are actual images of the stains on American Oak and may appear different depending on the wood you are using, consider these as a close indication of the colour.
