VertiTex II
vertical awning

Convenient control

VertiTex II and Plaza Viva can be controlled using radio technology with weinor BiConnect, Somfy io-homecontrol® or hard wired control.

7.00 p.m. Evening light

"Everything is simply stunning – even when the sun is low!"

A perfect couple! Plaza Viva is the pergola awning for virtually all weathers, VertiTex II shines as a universal vertical awning in an elegant design. The clever combination of these proven weinor systems promises reliable sun protection, privacy, wind and glare protection in your precious outdoor space – and all around it. This is because VertiTex II can be fitted all around or on individual sides.

VertiTex II vertical awning highlights:

- Compact, unobtrusive cassette design
- Round or square cassette
- Reliable side guide with rail or zip technology

Premium quality
made in Germany

Important note: A telescopic post is not possible for the Plaza Viva with VertiTex II. Reliable rain drainage is then only guaranteed during short showers from a pitch of 14 degrees. The weinor PergoTex II pergola awning with VertiTex II offers even more wind stability and protection from rain from a pitch of 8 degrees.
