Application
Perimeters

- Traversing Capacity
- Bending Measurement Guidelines
- Somfy Curtain Actuators Selection Charts

somfy.

- There are three main factors when considering a motors load capacity
  1. The Track Opening
  2. Curtain Shape
  3. Track length
- The Somfy Curtain Motor Selection chart uses the maximum weight of a curtain (in Kg). An accurate Somfy Curtain motor selection differs between the track configurations and lengths of track
- When calculating the weight of the curtain, the fullness ratio of the curtain must be considered

Weight of the curtain = fabric weight/m² x curtain covered area x fullness ratio

- The traversing capacity is given for an installation with no extra friction created by the fabric curtain touching the rail or the track pelmet
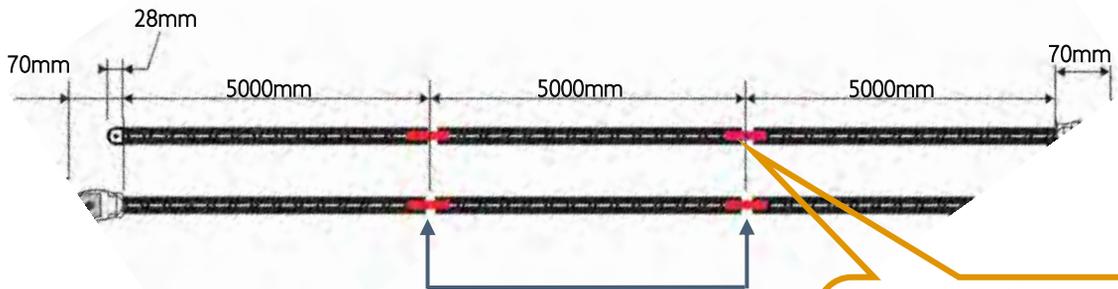

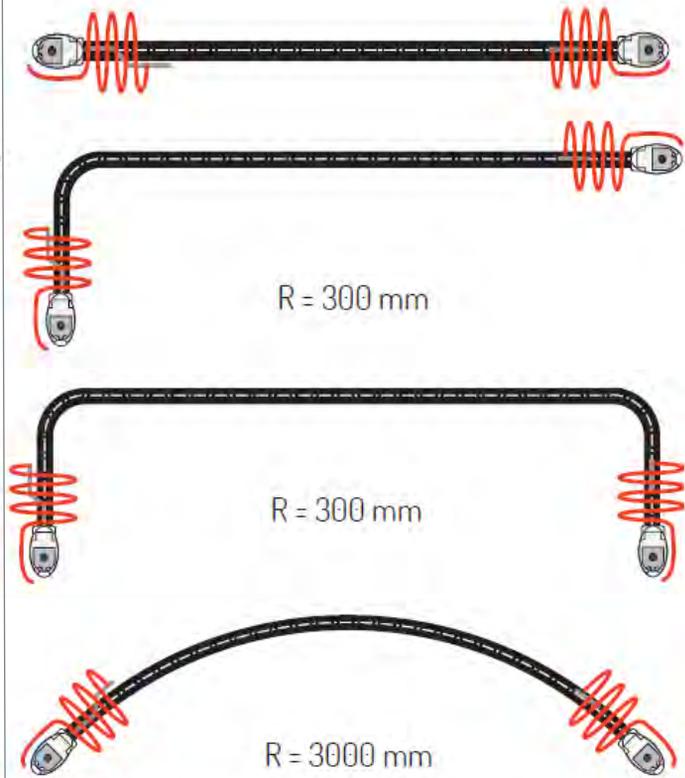

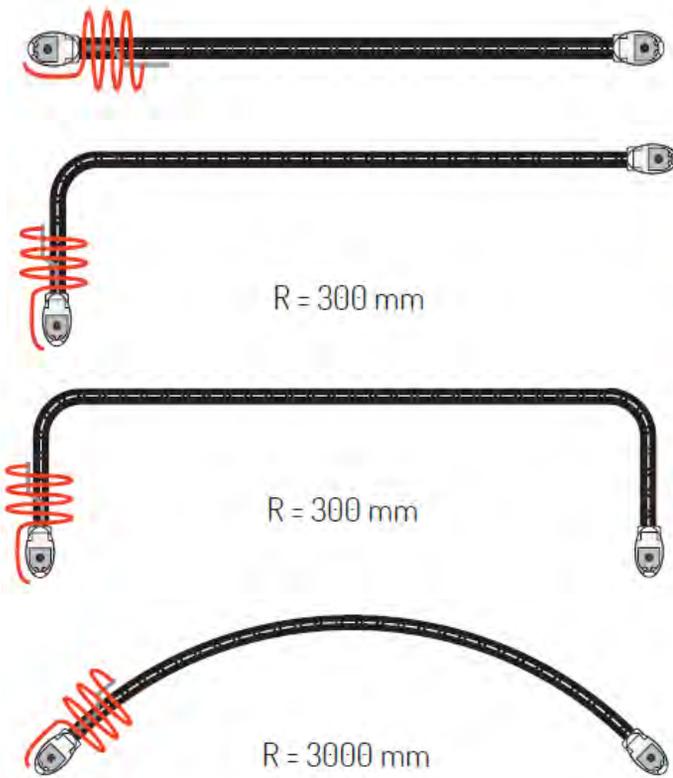

Bending Radius [minimum 300mm]

90°
R = 300mm

ARC Radius [minimum 3000mm]

R = 3000mm

! Due to the bending process 285mm of the rail still straight on the both side of the curve or the arc shape

somfy.

Bending Instructions And Limitations

- 1 x Rail length maximum = 4430mm
- Radius limitations:
  - Bent: 300mm ≤ R <3000mm
  - Curve: R ≤ 3000mm (Maximum length in one part 4430, in two parts 8860mm)

4430mm max. for 1 rail

285mm   285mm

! Due to the bending process 285mm of the rail still straight on the both side of the curve or the arc shape
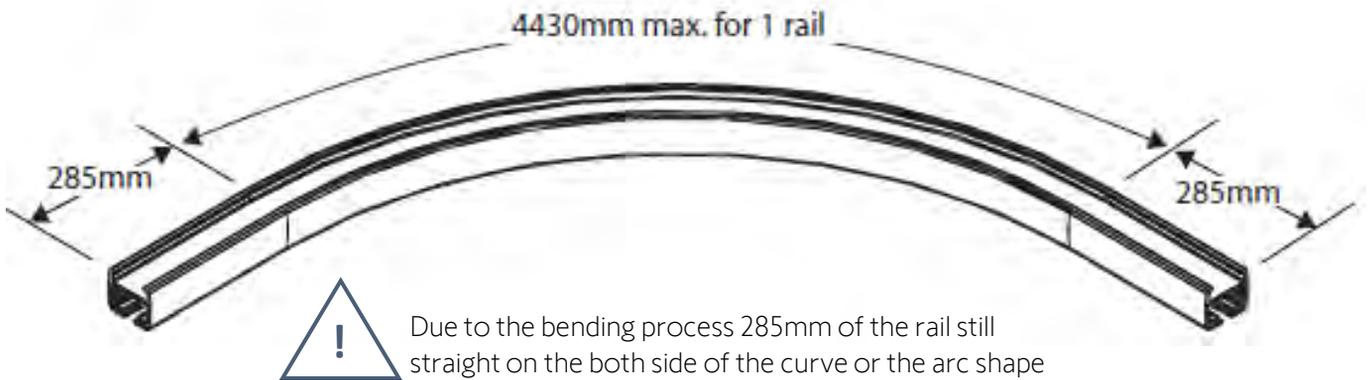

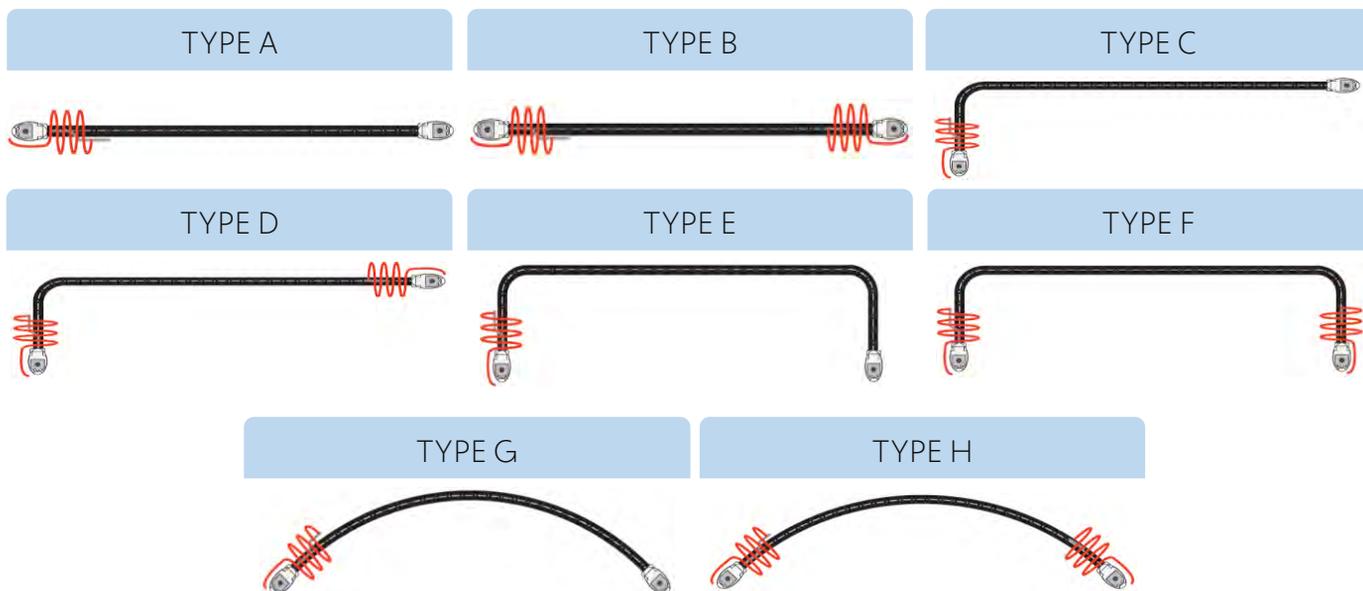

Bending Measurement Guide

- A track is broken down into straight and curved segments
- The straight length is measured in mm
- The curved radius is measured in mm + the angle in degree

Example:

Segment 3 = 2000 mm

Segment 2 = Angle 61°

Segment 1 = 650 mm

Radius = 450mm

Segment	Length in mm	or	Radius in mm	and	Angle in degree
1	650	or	--	and	--
2	--	or	450	and	61
3	2000	or	--	and	--

! The segment number one is always placed on the left-hand side when you are facing the window from the inside

CONSIDERATIONS:

- Maximum load per runner is 1.5kg
- Maximum distance between runners is 100mm
- The traversing capacity is given for an installation with no extra friction created by the fabric curtain touching the rain or the track pelmet
- Do not use non-Somfy track hardware
- Tracks must be installed horizontally

⚠ **WARNING!**
- The below configurations <u>are prohibited</u> and <u>not recommended</u> by Somfy

RTS INDIVIDUAL CONTROL WITH EMBEDDED RECEIVER [TANDEM OPERTION]
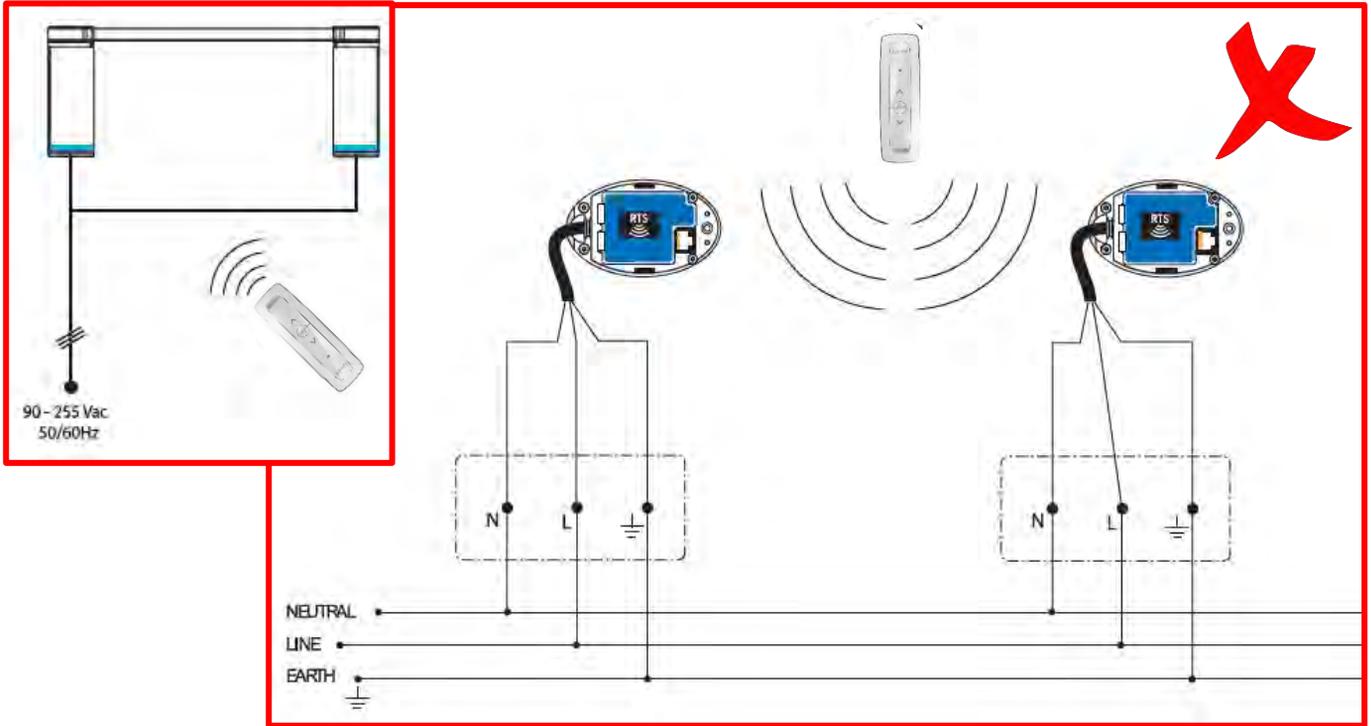

ANIMEO GROUP CONTROL BUCO, MOCCO & DCT INDIVIDUAL CONTROL

somfy.
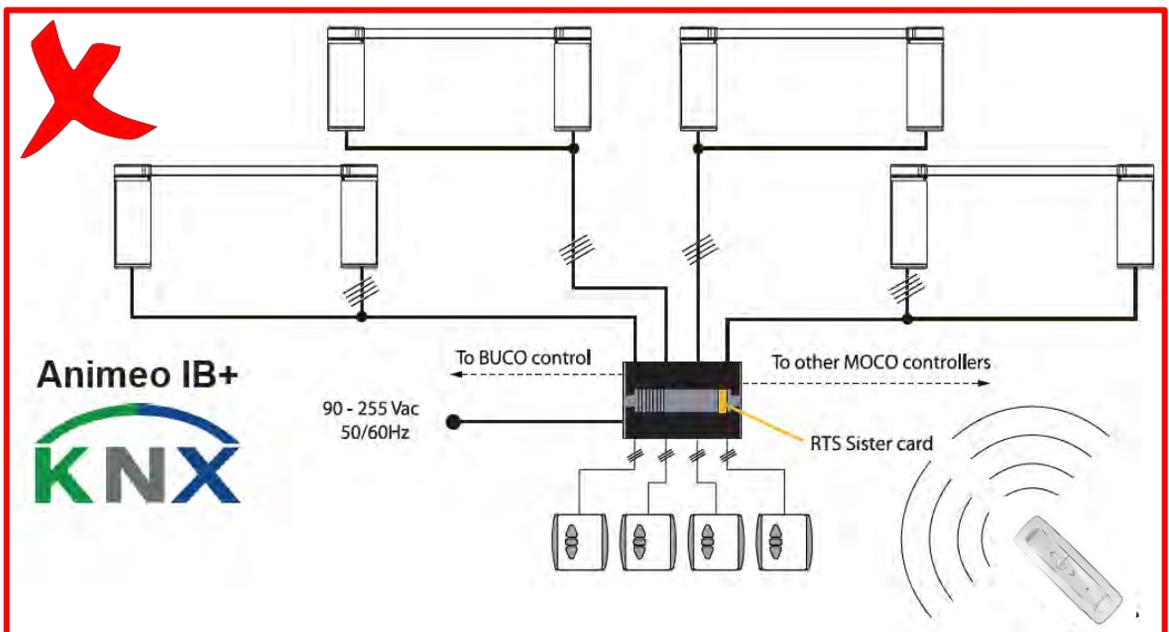

WARNINGS & CONSIDERATIONS:

- DCT wiring and installation is only applicable only once a Glydea 35e/60e WT or Movelite 35 WT has been converted to DCT [Refer to page 8 or 11 for instructions to convert WT to DCT]

- The below configurations **are strictly prohibited** and **not recommended** by Somfy
    - Glydea Ultra RTS is strictly prohibited on tandem applications
    - RTS Individual control with embedded receiver [Tandem Operation]
    - Animeo Group control BUCO, MOCO & DCT individual control

- Grease is **not** required with a Somfy high performance black belt [1782084]

- Use fixed position (maintained) AC Switches [WT motors]

- It is recommended that you contact Somfy Technical services before using an electronic switching device(s)

- The motor needs to be powered down before installing optional modules

- The compatible RTS receiver for a Glydea Ultra WT is a Centralis Indoor RTS receiver [1810096]

- The compatible RTS receiver for a Glydea Ultra DCT (refer to point 1) is a Dry Contact Receiver [1810750]

- Once the conversion to DCT is complete. A DCT setting tool (Ref # 9014599) is required to complete the control settings (i.e: Set limits, control and reset). Data cable sold separately [9015443]

Converting a WT Curtain Motor To a DCT Curtain Motor

Conversion Instructions

WT Motors (AC Switching):
You can switch from a WT Control mode (AC Switching) to Dry Contact Switching
(DCT), by connecting the black and brown wires permanently to live

Conversion Wiring Diagram

Wiring Key

	Wire	100V — 240V
1	Neutral	Blue
2	Live	Brown
3	Live	Black
4	Earth	Yellow / Green
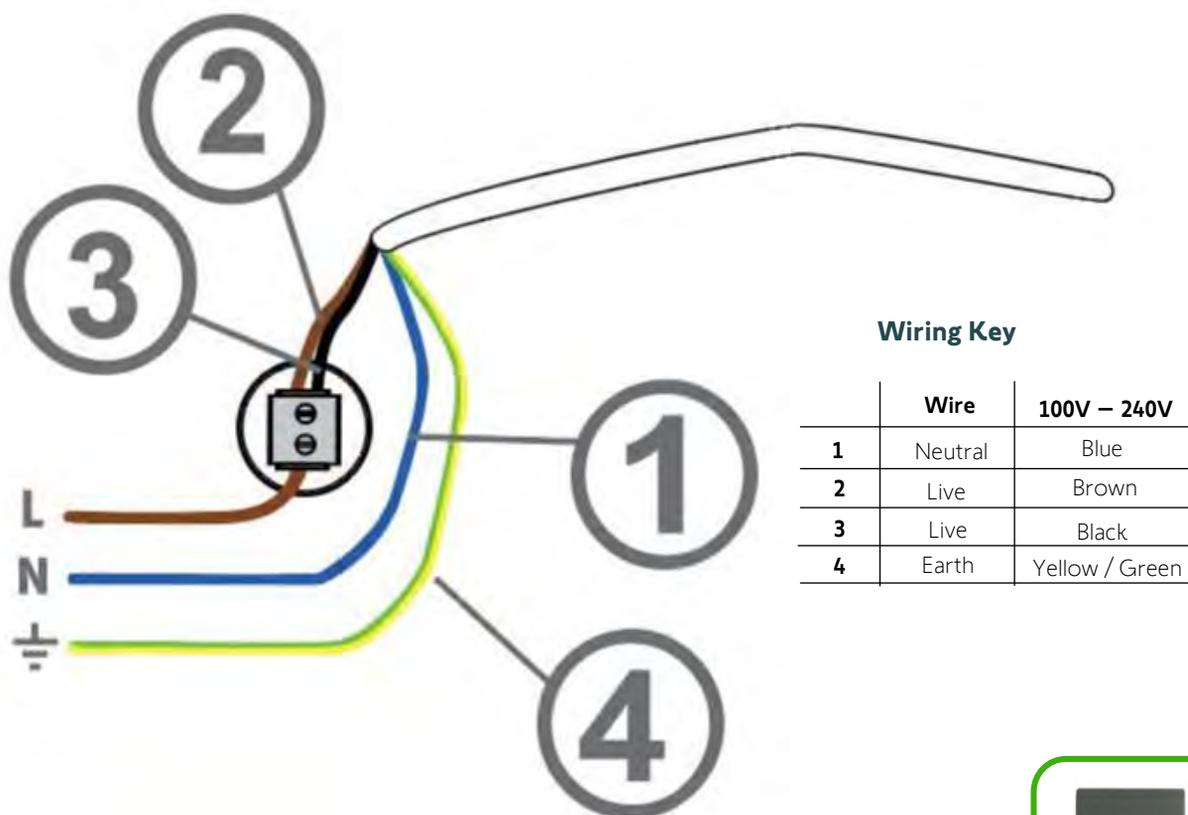

NOTE: Once the conversion to DCT is complete, a **DCT setting tool (Ref # 9014599)** is required to complete the control settings (i.e: Set limits, control and reset). **Data cable sold separately (9015443)**

⚠️ Once converted to a DCT motor, the motor can **only** be reset using the DCT Setting tool [9014599]. Refer to DCT manual for further information and instructions

Converting a WT curtain motor to DCT curtain motor must only be undertaken by a qualified electrician. For further information, please contact the Somfy Technical Support Team.

Top Mounting

By top mounting a Glydea Ultra (RTS or WT) or a Movelite 35 (RTS or WT) means the motor is mounted on top of the curtain track. This means the motor would sit in the recessed ceiling making the motor appear to be completely invisible

Top Mount Kit Ga [1780908]
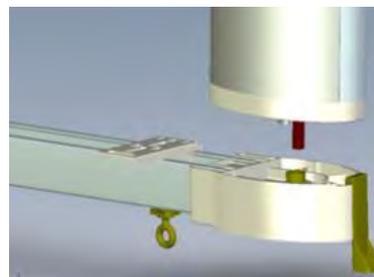

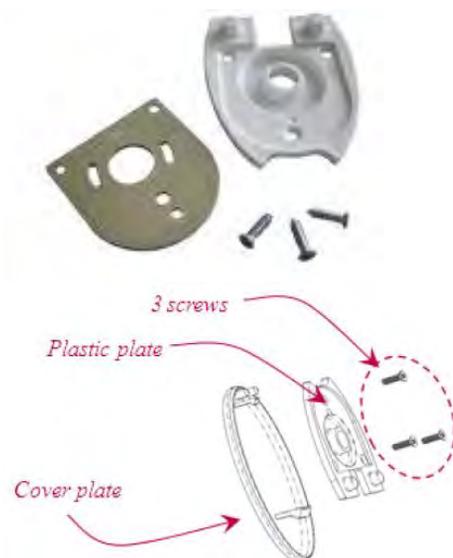

⚠️ **CONSIDERATIONS:**
- Radio reception could be reduced for motors installed in enclosures, especially if the enclosures are metallic
- Environmental conditions for top mount installations, including motors installed in enclosures, should not exceed those specified on the datasheet

Working temperature	0°C to +60°C
Humidity Rate	85% at 35°C

somfy.

Installation Instructions

Step 1.a — 1.c

1. **Drive Pulley preparation:**
   a. Unscrew and remove the metal plate from the bottom of the drive pulley housing
   b. Re-install the plastic plate with the drive pulley screws that were removed
   c. Install the cover plate supplied with the Top Mount Kit [1780908]
   d. Turn the drive pulley upside down and install the plastic plate from the top mount kit
   e. Install the metal plate that was removed from the bottom side
   f. Secure them with the 3 screws supplied with the kit

Step 1.d — 1.f

2. **Motor Installation:**
   • In the top mount configuration, the motor hook needs to be installed in the recess at the back of the drive pulley

⚠ **CONSIDERATIONS:**
   • Radio reception could be reduced for motors installed in enclosures, especially if the enclosures are metallic
   • Environmental conditions for top mount installations, including motors installed in enclosures, should not exceed those specified on the datasheet

Working temperature	0°C to +60°C
Humidity Rate	85% at 35°C
