

Somfy Home Automation

TOTAL CONTROL WITH YOUR SMARTPHONE AT HOME OR AWAY

Controlling all your blinds & awnings. Never been simpler.

Easily manage your smart home anywhere or anytime with TaHoma. Use the TaHoma Switch smart control, the TaHoma app, or voice commands.

The TaHoma Switch streamlines control with two customisable scene launcher buttons, simplifying access to your home devices. Tailor each button to create scenes that align with your daily routines. For instance, a quick tap on the "Going Out" scene button as you rush out in the morning.

Compatible with a wide range of Somfy and partner products, including gates, alarms, and heating systems, the TaHoma Switch ensures seamless integration. Partnering with major brands like Phillips and Clipsall, Somfy provides a tailored experience based on your wants.
